DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3, 5-14, and 16-29 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 6,175,934 to Hershey et al. is the reference closest to the claimed invention. Hershey et al. disclose a degradation diagnostic method, comprising: inputting an equipment degradation diagnostic request from a diagnosis requester through a network; selecting a degradation diagnosis request handler in accordance with degradation diagnosis execution condition information specified in respect of at least one degradation diagnosis request handler and condition information according to which said diagnosis requester requests degradation diagnosis; requesting said selected degradation diagnosis request handler to execute degradation diagnosis; acquiring execution results of degradation diagnosis by said selected degradation diagnostic request handler; and outputting execution results through said network to said diagnosis requester. However, Hershey et al. do not teach if environmental information utilized in degradation diagnosis by said selected degradation diagnosis request handler is deficient, a measurement request handler of said deficient environmental information is selected and is requested to measure said deficient environmental information, and said results of measurement of said deficient environmental information are provided to said selected degradation diagnosis request handler; and including all of the other limitations in the respective independent claims.
